CloudThat Launchpad for SMB

One Platform. Infinite Cloud & AI Possibilities

CloudThat Small and Medium Business Cloud Consulting Services

Helping Small & Medium Businesses Innovate, Scale, and Grow on AWS

Every growing business deserves access to enterprise-grade cloud capabilities without the complexity of managing enterprise-scale infrastructure. At CloudThat, we help small and medium businesses (SMBs) accelerate their cloud journey through cloud consulting, migration, modernization, security, managed services, and AI solutions tailored to their business needs.

Whether you're starting your cloud journey, modernizing existing workloads, or exploring AI-driven innovation, our AWS experts deliver secure, scalable, and cost-effective solutions that help you achieve measurable business outcomes.

Our Core Capabilities

- Cloud Strategy & Advisory
- Cloud Migration & Modernization
- Managed Cloud Services
- Security & Compliance
- Data & Analytics
- Generative AI Solutions
- DevOps & Automation
- Cost Optimization

Helping SMBs Build a Strong Cloud Foundation

Growing businesses often face technology challenges that slow innovation and increase operational complexity. Limited IT resources, legacy infrastructure, rising cloud costs, and evolving security requirements make it difficult to scale efficiently.

CloudThat helps businesses overcome these challenges through a structured cloud adoption approach that aligns technology investments with business objectives.

Our Consulting Approach

Discover

Understand your business goals, existing infrastructure, and future growth plans.

Assess

Evaluate cloud readiness, security posture, application landscape, and migration opportunities.

Design

Create scalable, secure, and cost-efficient cloud architectures tailored to your business.

Build & Migrate

Implement AWS environments and migrate workloads with minimal disruption.

Modernize

Adopt cloud-native technologies, automation, containers, and serverless architectures to improve agility.

Manage & Optimize

Continuously monitor, secure, optimize, and govern your cloud environment to maximize business value.

Industries We Support

- Retail & eCommerce
- Manufacturing
- Healthcare & Life Sciences
- Financial Services
- Education
- SaaS & Technology
- Logistics
- Professional Services

Cloud Infrastructure & Managed Services

Cloud Strategy & Advisory

Every successful cloud transformation begins with the right strategy. We assess your current environment, identify opportunities, and develop a roadmap that supports scalability, resilience, and long-term business growth.

Services

- Cloud Readiness Assessment
- AWS Well-Architected Review
- Cloud Adoption Roadmap
- Migration Assessment
- Landing Zone Design
- Total Cost of Ownership Analysis

Migration & Modernization

Accelerate cloud adoption with secure and efficient migration services that minimize business disruption while modernizing your applications and infrastructure.

Capabilities

- Application Migration
- Database Migration
- Server Migration
- Hybrid Cloud Deployments
- Containerization
- Infrastructure Modernization

Managed Cloud Services

Our managed services help businesses focus on innovation while we proactively manage cloud operations, security, availability, and performance.

Services

- Infrastructure Monitoring
- Incident Management
- Backup & Disaster Recovery
- Patch Management
- Capacity Planning
- Performance Optimization
- Cloud Cost Management

Business Outcomes

- Reduced operational costs
- Improved application availability
- Increased operational efficiency
- Enhanced scalability and business continuity

Data, AI & Modern Application Services

Data & Analytics

Transform business data into meaningful insights with scalable analytics solutions that support informed decision-making and future innovation.

Services

- Data Lakes
- ETL Pipelines
- Data Warehousing
- Business Intelligence
- Real-Time Analytics
- Data Governance

Generative AI

Create new opportunities with AI-powered solutions that improve productivity, automate processes, and enhance customer experiences.

Solutions

- AI Strategy & Readiness
- Intelligent Chatbots
- Knowledge Assistants
- Retrieval-Augmented Generation (RAG)
- Document Intelligence
- Amazon Bedrock Solutions
- Custom AI Applications

DevOps & Application Modernization

Accelerate software delivery using cloud-native architectures, automation, and DevOps best practices.

Capabilities

- CI/CD Pipelines
- Infrastructure as Code
- Kubernetes & Containers
- Serverless Applications
- DevSecOps
- Monitoring & Observability

Business Outcomes

- Faster innovation
- Improved productivity
- Better customer experiences
- Reduced operational overhead

Secure, Optimize & Grow with Confidence

Cloud Security & Governance

Security is embedded into every phase of our cloud engagements. We help businesses strengthen their security posture, improve governance, and protect critical workloads through proactive security and compliance practices.

Services

- Security Assessments
- Identity & Access Management (IAM)
- Cloud Security Posture Reviews
- Vulnerability Assessments
- Threat Monitoring
- Backup & Recovery
- Compliance Readiness

Why Businesses Choose CloudThat?

CloudThat combines deep AWS expertise with extensive experience in helping businesses accelerate cloud adoption, modernization, and innovation. Backed by AWS-validated capabilities and a customer-first approach, we deliver secure, scalable, and cost-effective cloud solutions that drive measurable business outcomes.

Our AWS Expertise

Our proven AWS capabilities are backed by industry-recognized validations and successful customer engagements.

- **AWS Premier Tier Services Partner** and **AWS Managed Service Provider (MSP)**
- **7 AWS Competencies** across key solution areas, including **Generative AI, Migration, Data & Analytics, DevOps, Networking, Education, and Microsoft Workloads**
- **21 AWS Service Delivery Programs (SDPs)** validating technical proficiency across specialized AWS services
- **6 AWS Partner Programs** demonstrating our commitment to delivering AWS best practices
- **Team of AWS-certified architects, consultants, and engineers**
- Proven customer success across cloud migration, modernization, security, data, AI, and managed services

Flexible Engagement Models

Every business has unique goals and cloud maturity levels. Our flexible engagement models are designed to provide the right expertise and support at every stage of your cloud journey.

- **Advisory & Consulting** – Cloud strategy, assessments, architecture, and adoption roadmaps
- **Professional Services** – Migration, modernization, implementation, and optimization projects
- **Managed Services** – Proactive monitoring, operations, security, and continuous cloud optimization
- **Staff Augmentation** – Access to AWS-certified architects, engineers, and DevOps specialists
- **Innovation Workshops** – Collaborative sessions to identify opportunities in AI, analytics, security, and cloud modernization

Our Global Presence
