

DEVELOPING SERVERLESS SOLUTIONS ON AWS CERTIFICATION TRAINING

Course Level:
Intermediate

Course Duration:
3 Days

Course Overview:

This Developing Serverless Solutions on AWS certification training course from CloudThat teaches candidates the best practices to build serverless applications using the AWS Lambda and other services in the AWS serverless platform. This course introduces Serverless Architecture on AWS and teaches candidates how to use AWS frameworks to deploy a serverless application through hands-on labs on both simpler and complex topics.

By taking up this serverless development environment AWS course, candidates also acquire in-depth knowledge and understanding through presentations, demonstrations, videos, knowledge checks, and group exercises.

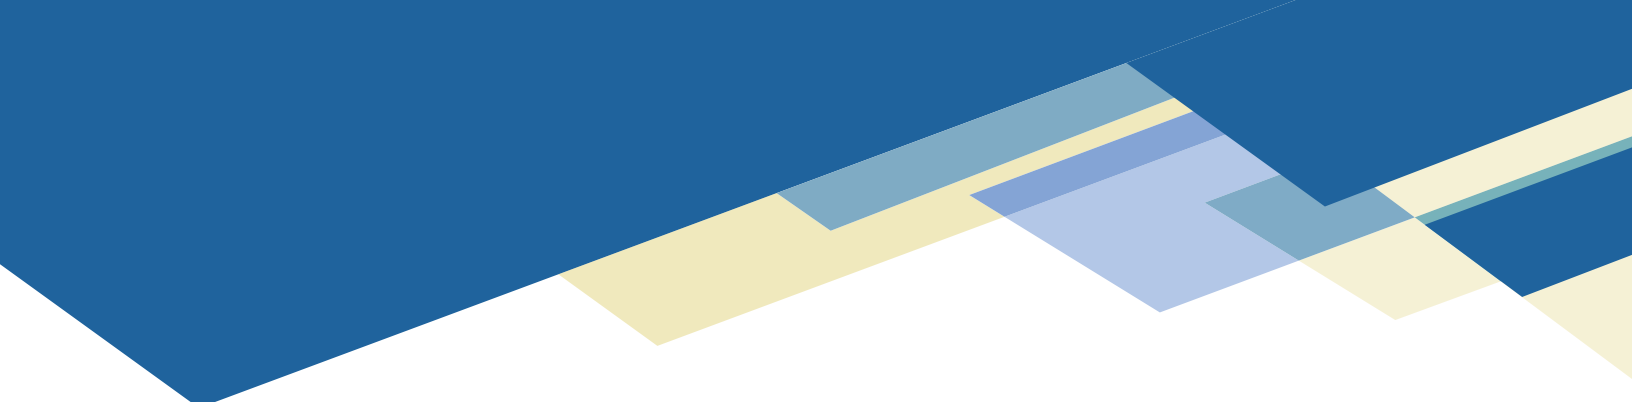

Prerequisites

We recommend that attendees of this Developing Serverless Solutions on AWS certification course have:

-  Familiarity with the basics of AWS Cloud architecture
-  An understanding of developing applications on AWS equivalent to completing the Developing on AWS classroom training
-  Knowledge equivalent to completing the following serverless digital trainings: AWS Lambda Foundations and Amazon API Gateway for Serverless Applications

Objectives

-  Apply event-driven best practices to a serverless application design using appropriate AWS services
-  Identify the challenges and trade-offs of transitioning to serverless development, and make recommendations that suit your development organization and environment
-  Build serverless applications using patterns that connect AWS managed services together, and account for service characteristics, including service quotas, available integrations, invocation model, error handling, and event source payload
-  Compare and contrast available options for writing infrastructure as code, including AWS CloudFormation, AWS Amplify, AWS Serverless Application Model (AWS SAM), and AWS Cloud Development Kit (AWS CDK)
-  Apply best practices to writing Lambda functions inclusive of error handling, logging, environment re-use, using layers, statelessness, idempotency, and configuring concurrency and memory

- 
- ☁ Apply best practices for building observability and monitoring into your serverless application
 - ☁ Apply security best practices to serverless applications
 - ☁ Identify key scaling considerations in a serverless application, and match each consideration to the methods, tools, or best practices to manage it
 - ☁ Use AWS SAM, AWS CDK, and AWS developer tools to configure a CI/CD workflow, and automate deployment of a serverless application
 - ☁ Create and actively maintain a list of serverless resources that will assist in your ongoing serverless development and engagement with the serverless community

Attend Any 5 AWS Certification Trainings at the cost of 2 with AWS Mastery Pass!

Learn from industry certified experts and become a certified AWS professional without leaving your current job!

[Know More](#)

Course Outline

Day 1

Module 0: Introduction

- Introduction to the application you will build
 - Access to course resources (Student Guide, Lab Guide, and Online Course Supplement)
- 

Module 1: Thinking Serverless

- Best practices for building modern serverless applications
- Event-driven design
- AWS services that support event-driven serverless applications

Module 2: API-Driven Development and Synchronous Event Sources

- Characteristics of standard request/response API-based web applications
- How Amazon API Gateway fits into serverless applications
- Try-it-out exercise: Set up an HTTP API endpoint integrated with a Lambda function
- High-level comparison of API types (REST/HTTP, WebSocket, GraphQL)

Module 3: Introduction to Authentication, Authorization, and Access Control

- Authentication vs. Authorization
- Options for authenticating to APIs using API Gateway
- Amazon Cognito in serverless applications
- Amazon Cognito user pools vs. federated identities

Module 4: Serverless Deployment Frameworks

- Overview of imperative vs. declarative programming for infrastructure as code
- Comparison of CloudFormation, AWS CDK, Amplify, and AWS SAM frameworks
- Features of AWS SAM and the AWS SAM CLI for local emulation and testing

Module 5: Using Amazon EventBridge and Amazon SNS to Decouple Components

- Development considerations when using asynchronous event sources
 - Features and use cases of Amazon EventBridge
 - Try-it-out exercise: Build a custom EventBridge bus and rule
- 

- Comparison of use cases for Amazon Simple Notification Service (Amazon SNS) vs. EventBridge
- Try-it-out exercise: Configure an Amazon SNS topic with filtering

Module 6: Event-Driven Development Using Queues and Streams

- Development considerations when using polling event sources to trigger Lambda functions
- Distinctions between queues and streams as event sources for Lambda
- Selecting appropriate configurations when using Amazon Simple Queue Service (Amazon SQS) or Amazon Kinesis Data Streams as an event source for Lambda
- Try-it-out exercise: Configure an Amazon SQS queue with a dead-letter queue as a Lambda event source Hands-On Labs
- Hands-On Lab 1: Deploying a Simple Serverless Application
- Hands-On Lab 2: Message Fan-Out with Amazon EventBridge

Day 2

Module 7: Writing Good Lambda Functions

- How the Lambda lifecycle influences your function code
- Best practices for your Lambda functions
- Configuring a function
- Function code, versions and aliases
- Try-it-out exercise: Configure and test a Lambda function
- Lambda error handling
- Handling partial failures with queues and streams

Module 8: Step Functions for Orchestration

- AWS Step Functions in serverless architectures
- Try-it-out exercise: Step Functions states
- The callback pattern
- Standard vs. Express Workflows
- Step Functions direct integrations
- Try-it-out exercise: Troubleshooting a Standard Step Functions workflow

Module 9: Observability and Monitoring

- The three pillars of observability
- Amazon CloudWatch Logs and Logs Insights
- Writing effective log files
- Try-it-out exercise: Interpreting logs
- Using AWS X-Ray for observability
- Try-it-out exercise: Enable X-Ray and interpret X-Ray traces
- CloudWatch metrics and embedded metrics format
- Try-it-out exercise: Metrics and alarms
- Try-it-out exercise: ServiceLens Hands-On Labs
- Hands-On Lab 3: Workflow Orchestration Using AWS Step Functions
- Hands-On Lab 4: Observability and Monitoring

Day 3

Module 10: Serverless Application Security

- Security best practices for serverless applications
- Applying security at all layers
- API Gateway and application security
- Lambda and application security
- Protecting data in your serverless data stores
- Auditing and traceability

Module 11: Handling Scale in Serverless Applications

- Scaling considerations for serverless applications
 - Using API Gateway to manage scale
 - Lambda concurrency scaling
 - How different event sources scale with Lambda
- 

Module 12: Automating the Deployment Pipeline

- The importance of CI/CD in serverless applications
- Tools in a serverless pipeline
- AWS SAM features for serverless deployments
- Best practices for automation
- Course wrap-up Hands-On Labs
- Hands-On Lab 5: Securing Serverless Applications
- Hands-On Lab 6: Serverless CI/CD on AWS

Who Should Attend This Course?

Developers who have some familiarity with serverless and experience with development in the AWS Cloud.

About CloudThat

CloudThat is the first company in India to offer Cloud Training & Consulting services for mid-market & enterprise clients from across the globe. Since our inception in 2012, we have trained over 500K IT professionals from fortune 500 companies on technologies such as Microsoft Azure, Amazon Web Services, VMware, Artificial Intelligence, Machine Learning, Google Cloud, IoT, Dynamics 365, Power Platform, Power BI, HPE AI, DevOps, Big Data, Kubernetes, Terraform and more.

With expertise in all the major Cloud platforms, CloudThat is a proud Microsoft Gold Partner, AWS Authorized Training Partner, VMware Authorized Training Reseller, Google Cloud Platform Partner and HPE Learning Partner. Through sheer dedication and commitment towards customer excellence, we have been the winner of the Microsoft Asia Superstar Campaign for India – 2021 as well as recognized as the winner of Microsoft Learning Partner of the Year 2021 Finalist award. Recently, we have been recognized as the Microsoft 2022 Partner of the Year Finalist - Learning Award.

Our Success Track

11+ Years
of Experience

100+
Corporates served

28+
countries catered

650K+
Professionals trained

300+
Projects delivered

500+
Cloud certifications
